

# #3DnukeMissile Pontresina

## Help prevent a nuclear war!

This 3D street painting exposes the hidden threat to human civilisation – the thousands of nuclear missiles and bombs hidden underground or on submarines under the ocean.

This includes US nuclear weapons based in Aviano, Italy, just 80 kilometres from Pontresina.

The launch of a nuclear war by accident, miscalculation or intent could trigger catastrophic destruction the likes of which we have never experienced. Such risks have increased markedly with the Russian invasion of Ukraine.
