

NUCLEAR GAMES

A RACE INTO A DEAD END

Nuclear Games is a **journey around the world** with stories from every continent about the **nuclear horror**. In a unique combination of animation and documentary, these stories show how the power of nuclear fission has led people over the past eight decades to take incalculable risks and put the health and lives of millions of people at stake.

Stronger, faster, further, deadlier – nuclear technology is taking the **competition between nations** and people's **quest for absolute power** to a threatening absurdity.

www.nuclear-games.net

STRONGER, FASTER, FURTHER, DEADLIER

The starting point for this documentary is the **Olympic Games 2021** in Japan.

Of all places, the province of **Fukushima** – where a disastrous nuclear accident has made large regions uninhabitable – is where the race with the Olympic torch started.

And is it not contradictory that athletes compete peacefully with each other in the spirit of the Olympic Games, while at the same time in bunkers around the world officers are ready to wipe out entire continents on a single command?

WE TELL **SIX STORIES** FROM THE NUCLEAR CHAIN – FROM URANIUM MINING TO NUCLEAR REACTORS TO THE BOMB. WE SHOW THE BACKGROUND OF KNOWN AND UNKNOWN HISTORICAL EVENTS AND WHAT EFFECT THEY HAD ON THE FATE OF INDIVIDUALS.

CUBA

NIGER

CHERNOBYL

BIKINI

NORTH KOREA

Humanity owes its existence to a determined **submarine commander** whose principled action prevented nuclear war from breaking out between the U.S. and the Soviet Union in the Cuban Missile Crisis.

Uncovering the inhumane conditions in which **Touaregs in Niger** work in uranium mines and are exposed to ionizing radiation – almost without protection.

In 1986 **young men** were used in **Chernobyl** as bio-robots to save the world from an even greater catastrophe. It is not only the men who were sacrificed, but also their loved ones and even unborn children paid a high price.

The tragic story of King Juda and the **Bikini people**, who were forced to abandon their home islands to enable U.S. nuclear testing, including one of the most destructive nuclear blasts ever.

Meeting a **dictator in North Korea**, who has a strange love of nuclear weapons and links the existence of his regime to the possession of a nuclear arsenal.

Nuclear Games will be available for **virtual screenings** and as a **web documentary** from the start of the Olympic Games in **summer 2021**.
