NO NUKES, NO CARBON FOOTPRINT

16,000 nuclear weapons remain in the world.

Just one nuke would destroy your town or city.

40-50 nukes could destroy the global climate.

180 governments meet at the United Nations in New York from 27 April – 22 May to discuss nuclear disarmament.

Tell the governments it’s time to abolish nukes.

Wave goodbye to nuclear weapons from your town or city.

Post a photo or video on social media and we will ensure the governments see it.

No need to travel to New York. No need to increase your carbon footprint.
